Kapci Mixing Scheme Machines

Kapci Mixing Scheme Machines

Kapcibase 670 is a solvent-based basecoat mixing system for repainting of passenger cars and commercial vehicles. It consists of solid color basecoats, metallic basecoats, pearlescent and special effect basecoats. Kapcibase 670 basecoat toners are easy to use, fast drying and have very good coverage and durability. When used in conjunction with a range of Kapci Clearcoats, Kapcibase 670 delivers long-lasting high gloss finish.

Kapcicryl 660 2k acrylic mixing system, is a comprehensive array of 2k acrylic colorants for repainting of passenger cars and commercial vehicles. Kapcicryl 660 consists of 2k acrylic-urethane direct gloss topcoats delivering a high gloss finish, excellent durability and excellent coverage. Kapcicryl 660 2k topcoats can be used for any size of repair jobs, when used in conjuction with in conjunction with a range of kapci ms hardeners.

Kapci Dima

Kapci Dima 9670 is a waterborne base coat mixing system for repainting of passenger cars and commercial vehicles. Dima 9670 paints significantly reduce solvent-based emissions and comply with all compliance regulations.

The mixing system offers comprehensive basecoat colour matching that includes metallic, pearlescent, solid colour basecoats and special effect finishes. The system has more than 70 basecoat toners developed to give high-quality reducer based colour mixes. Colour matching with Kapci Dima waterborne paints has been made efficient and 100% reliable through the use of KAPCIBLINK 5A.

Kapci Color Tools

Variant Color Box

The kapci variant system is made up of color boxes with 120 color swatches, totaling 9,000 colors. The comprehensive system can be used to retrieve over 35000 colours. The front of the swatch cards shows the colour as a spray out and the back features the colour code.

International Color Box

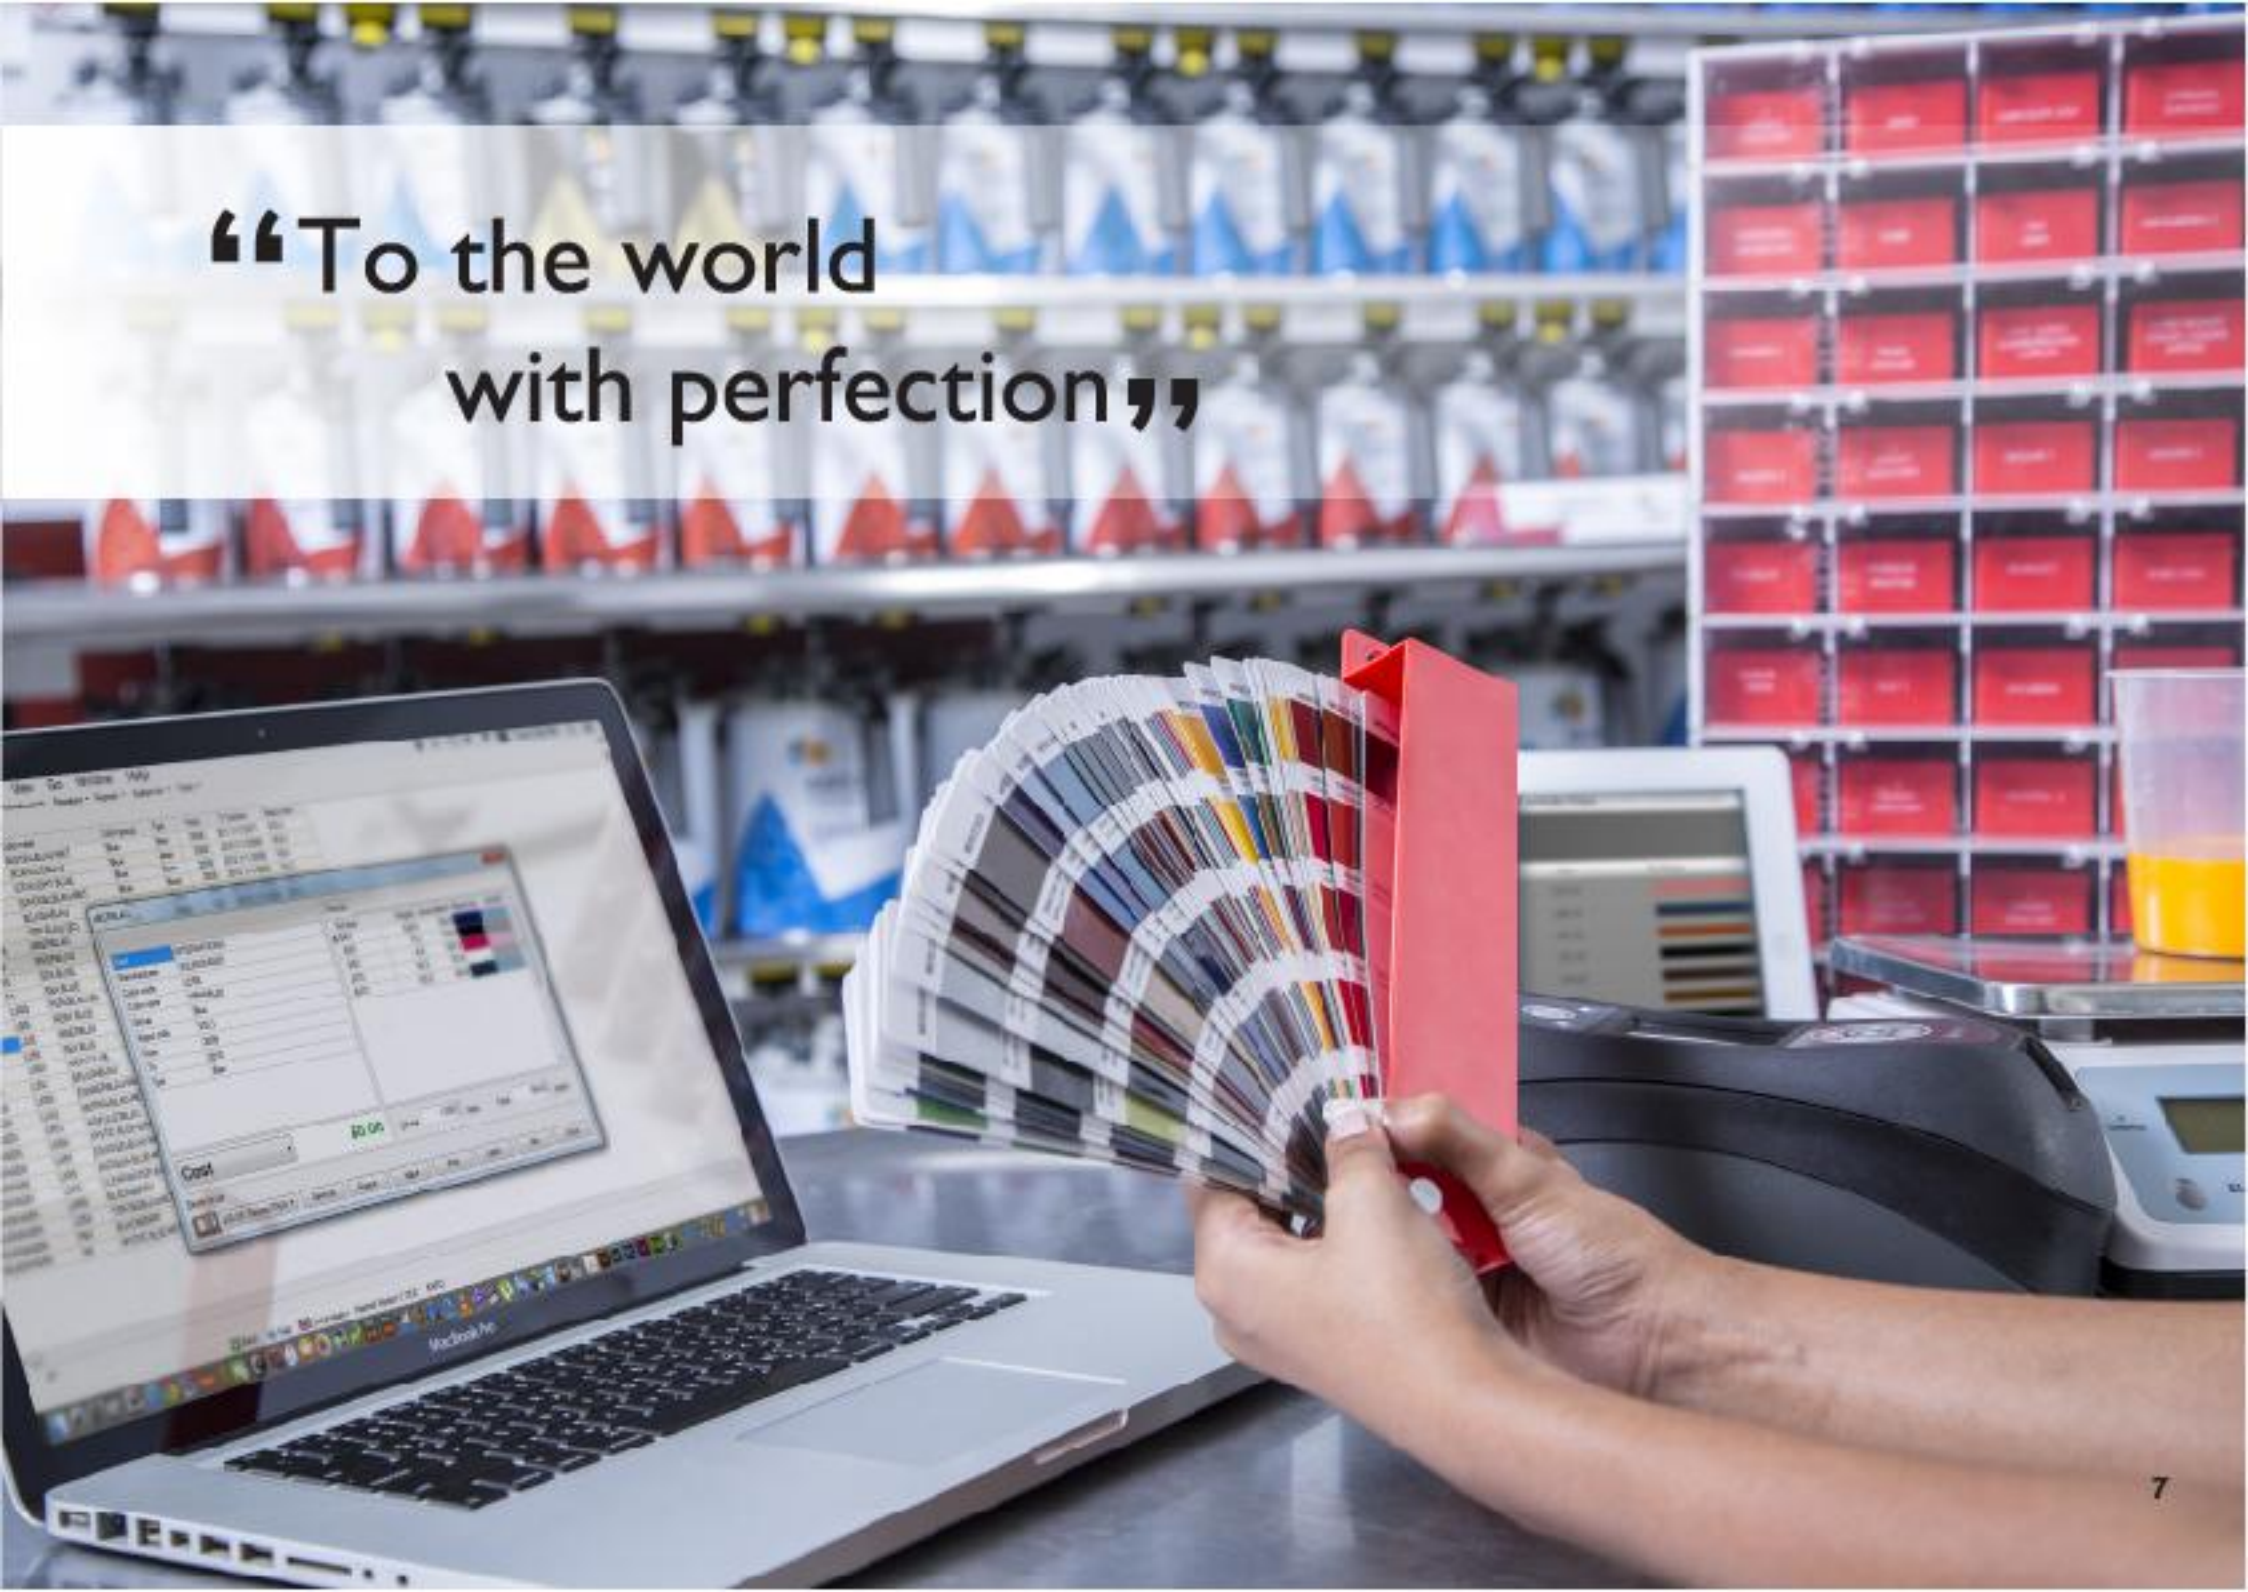

The International Color Box contains more than 14 500 standard colors of all International vehicle brands. All colors have the formulas available on the Kapci Smart Mix system and therefore are just a touch away from retrieval.

Kapci Color Guide

In situations where a user does not have a manufacturer's color code the KAPCI Color Guide comes in handy in quickly identifying and selecting the correct color family. The system covers the whole spectrum for matching of over 4 000 solid, metallic and pearlescent colors. Covering the entire color spectrum, the system provides the correct color match in the shortest possible time.

“To the world
with perfection”

KAPCIBlink 5A

CHOOSE YOUR COLOR PERFECTLY

Spectrophotometer

Kapci Coatings has developed a new hand-held color matching tool called "Kapci Data color find".

KAPCI BLINK 5A

The KAPCIBLINK 5A is a compact and easy- to-use multi-angle spectrophotometer with five standard measuring angles that allow you to accurately evaluate and control solid colors, pearl colors, metallic colors and finishes with special effects. Thanks to its strategically located optical components, it can be accurately positioned even at difficult intersections. In addition, it is so light that it can be used with just one hand. The KAPCIBLINK 5A is an economic instrument that provides practical data to drive the improvement of current processes, while ensuring color harmony. The device is compatible with all Kapci colour solutions and you can integrate it perfectly with your current color quality control processes with virtually no downtime.

Why choose KAPCIBLINK 5A?

- Minimizes user fatigue thanks to the fact that it is 50% lighter and more compact than any other five-angle device and can easily be used with just one hand.
- It has LED indicators that ensure correct alignment when working with flexible or irregular samples.
- Take quick measurements in approximately 2.5 seconds and capture multiple data points when scheduled for automated tasks.
- It includes green and red lights that indicate whether the result is within or outside the tolerance range, respectively, which allows an error-free analysis. It includes a base that allows you to connect the device in a practical way to a PC and charge it.

The KAPCIBLINK 5A includes an on-screen temperature preview that helps users identify if color data is affected by a thermochromic problem. It also allows you to enter and analyze data intuitively with a touch interface and simple navigation functions. In addition, when combined with the Kapci Search and Correct software, it supports advanced features such as job databases for multiple tasks.

Kapci Color
Search & Correct Software

To navigate the colors library, KAPCI offers the comprehensive Kapci Search and Correct software for fast access to the right formula for matching each color, and its color retrieval options are second to none. KAPCI embraces the latest technology to offer mobile access on smart devices as well as computerized touchscreen mixing and retrieval in addition to a full-featured paint management software system and best-in-class spectrophotometer KAPCIBLINK 5A.

With S&C Software the user can connect KAPCI BLINK 5A after taking a measurement using the spectrophotometer thereby transferring the reading to the software. If the color does not match, a correction can be made on the software by use of the Search and Correct License made available with the software.

It has a user friendly interface which provides

1.All formulas for Car manufacturer colors and their variants
2.Toners Info (description - package)
3.Toners direction (face tone and flip tone)
4.Kapci Color Guide
5.Online updates
6.Store management
7.Connection to electronic scales (For more information about recommended scale systems please contact us: info@kapci.com)
8.Detailed reports on material yield, user management, inventory management and the ordering procedure
9.Customer formula management

KAPCI-SmartMix App

Avaliable Now

Car Refinish color retrieval has gone mobile with KAPCI Coatings' newest system SmartMix. Color Online Mobile brings the convenience of the car color search and paint mixing to your Android system and IOS system as well. The service is web based and available free of charge at all the times. KAPCI Coatings Car Refinishes site has been delivering online solutions to KAPCI Coatings customers since 2004, draws on the most complete database of car colors available, and is updated every two weeks. That means that you have access to the very latest formulas for the full range of KAPCI Coatings Car Refinishes products straight from the mobile phone in your palm of hand.

With Smart Mix Online Mobile, it's no longer necessary to request formula information from a laptop or desktop. All the customer needs to do is to enter simple, straightforward search criteria (such as make, year, color code and/or color group) via Android Phone the web site provides the formula for a perfect color match.

Features:
- SmartMix works on Android system and IOS system.
- Search car color by manufacturer, car color code or color group
- Choose you preferred color
- Adjust amounts of paint to mix based on your preference
- Automatically convert car paint mix amounts from weight to volume and vice versa
- Check the various versions of the color formula
- Mix car paint cumulative or absolute

KAPCI
COATINGS

Primers

Kapci 800

1K Etch Primer

Kapci 800 is a mild 1K etch primer used under Kapci 1K and 2K topcoats and Kapci basecoat colors. It is especially recommended for spot repairs and for wet on wet applications over a new original (OEM) car panels. For additional building Kapci 800 can be overcoated with any Kapci 2K filler/primer before topcoating.

Kapci 805

2K Wash Primer

Kapci 805 is a 2K wash primer used as a primer for application over steel, galvanized steel, aluminum as well other light metals as it provides good adhesion and anticorrosion properties.

Kapci 810

Zinc Rich
2K Epoxy Primer

Kapci 810 is a 2K epoxy primer with high content of zinc. It delivers excellent anticorrosion properties and is especially recommended for the protection of steel surfaces being exposed to weathering without a protective coating for a certain period of time.

Kapci 820

2K Weldable Primer

Kapci 820 is a 2K weldable primer based on epoxy resin which delivers excellent corrosion protection when applied over sandblasted steel components. This high performances 2K primer allows two metal surfaces to be primed prior to the welding process.

These products are for the professional painting of automotive vehicles only after referenceto the manufacturer's Material Safety Data Sheets (MSDS)

Kapci 835

Synthetic Primer

Kapci 835 is a 1K fast drying synthetic primer with good anticorrosion properties and adhesion over steel. Kapci 835 can be recoated with 1K topcoats. Diluted with white spirit or turpentine.

Kapci 850

Synthetic Primer

Kapci 850 is a 1K fast drying synthetic primer with good anticorrosion properties and adhesion over steel. Kapci 850 can be recoated with 1K topcoats. Diluted with NC thinner.

Kapci 870

2K Epoxy Primer 4:1

Kapci 870 is 2K epoxy primer with high anticorrosion properties, fast drying, outstanding chemical resistance and good adhesion over steel, stainless steel, galvanized steel, and aluminum. Kapci 870 can be recoated with 2K fillers, 2K topcoats, and basecoats/clear-coats.

Kapci 873

2K Epoxy Primer High Build

Kapci 873 is a high build fast dry 2K epoxy primer especially designed for one coat application over blast cleaned steel. It can also be applied in a standard mode by using a spray gun and can be applied over different substrates including galvanized steel, aluminum, GRP and old finishes thoroughly dry. Kapci 873 has excellent corrosion resistance and outstanding application properties offering fast drying, high build and easy application onto vertical surfaces.

These products are for the professional painting of automotive vehicles only after referenceto the manufacturer's Material Safety Data Sheets (MSDS)

Kapci 875

2K Epoxy Primer

Kapci 875 is 2K epoxy primer with high anticorrosion properties, fast drying, outstanding chemical resistance and good adhesion over steel, stainless steel, galvanized steel and aluminum. Kapci 875 can be recoated with 2K fillers, 2K topcoats, and basecoats.

Kapci 880

2K Epoxy Primer 2:1

Kapci 880 is a 2K epoxy primer with excellent anticorrosion properties, outstanding chemical resistance and good adhesion over steel, stainless steel, galvanized steel, and aluminum. Kapci 880 can be recoated with 2K fillers, 2K topcoats, and basecoats.

These products are for the professional painting of automotive vehicles only after referenceto the manufacturer's Material Safety Data Sheets (MSDS)

KAPCI
COATINGS

Putties

Kapci 350

PE Putty

Kapci 350 is a general purpose putty based on polyester resins. It provides the best foundation for all Kapci paint systems combining easy application with easy sanding.

Kapci 355

Elastic PE Putty for plastic

Kapci 355 is a polyester-based elastic putty especially designed for application over plastics. It adheres excellent to plastics, has excellent flexibility and resistance to wrapping. It can be applied over any kind of plastics except polyethylene (PE) and may be used under any Kapci filler. Its gray anthracite color is similar to the original color of plastic car parts.

These products are for the professional painting of automotive vehicles only after referenceto the manufacturer's Material Safety Data Sheets (MSDS)

Kapci 360

Polyfiber PE Putty

Kapci 360 is a polyester-based putty which contains glass fibers. Its higher amount of glassfibers provides thick layers in filling of deeper dents, small holes and bridging of cracks.

Kapci 365

Mixed Fiber PE Putty

Kapci 365 is a polyester-based putty which contains glass fibers to provide thicker layers when used in standard filling operations and for filling of deeper dents.

Kapci 373

Lightweight Body Filler

Kapci 373 is a lightweight general purpose body filler based on polyester resin. It is particularly suitable for filling of large surface areas due to its lower density. Its optimized viscosity and thixotropy deliver ease of mixing, application, and sanding.

These products are for the professional painting of automotive vehicles only after referenceto the manufacturer's Material Safety Data Sheets (MSDS)

Kapci 374

Lightweight Fine Body Filler

Kapci 374 is a lightweight fine body filler based on polyester resin. Its finer coarseness and lower viscosity provide easy application and compact surface. It is suitable for application in thin layers and for fine filling of scratches and smaller irregularities.

Kapci 375

Lightweight Body Filler

Kapci 375 is a lightweight low viscosity general purpose body filler based on polyester resins. Due to lower viscosity, Kapci 375 delivers very easy application, easy sanding and compact surface as well.

These products are for the professional painting of automotive vehicles only after reference to the manufacturer's Material Safety Data Sheets (MSDS)

Kapci 377

Kapci 377 is polyester (PE) filling primer used for filling of irregularities on car body, mildly cracked or crazed paint films and sand scratches.

Kapci 380

Aluminum PE Putty

Kapci 380 is 2K polyester-based putty which contains fine aluminium flakes providing increased film thickness and resistance to vibrations. It can be used over bare steel, galvanized steel, aluminium and glass fibre reinforced plastic (GRP) for filling of irregularities

These products are for the professional painting of automotive vehicles only after referenceto the manufacturer's Material Safety Data Sheets (MSDS)

Kapci 400

NC Putty

Kapci 400 is an extra rapid 1K putty based on a nitrocellulose resins blend. It is used for fine and smooth leveling of minor irregularities, scratches and pores.

Kapci 410

NC Putty

Kapci 410 is an extra rapid 1K putty based on a nitrocellulose resins blend. It delivers excellent filling properties and is used for fine and smooth leveling of minor irregularities, scratches and pores.

Kapci 450

NC Putty

Kapci 450 is an extra rapid 1K putty based on a nitrocellulose resins blend. It delivers excellent filling properties and is used for fine and smooth leveling of minor irregularities, scratches and pores.

These products are for the professional painting of automotive vehicles only after referenceto the manufacturer's Material Safety Data Sheets (MSDS)

KAPCI
COATINGS

Fillers

Kapci 1K

1K Filler

Kapci 1K Filler is a product based on a nitrocellulose-combination of resins providing very fast drying. The product is suitable for fine filling of small damages on car surface before topcoating with any Kapci topcoat.

Kapci 625

2K Acrylic Filler

Kapci 625 is a 2K acrylic filler especially developed for use under Kapcicryl 2K acrylic topcoats and Kapcibase basecoat colors. It delivers easy application, easy sanding, good color hold out and finish.

These products are for the professional painting of automotive vehicles only after referenceto the manufacturer's Material Safety Data Sheets (MSDS)

Kapci 630

2K HS Acrylic Filler
VOC Compliant

Kapci 630 is a 2K high solids acrylic filler developed for use under solvent-based and waterborne basecoat colors and 2K topcoats. It provides easy application, easy sanding and good color hold out and finish.

Kapci 635

2K Acrylic Filler

Kapci 635 is a 2K acrylic filler especially developed for use under Kapcicryl 2K acrylic topcoats and Kapcibase basecoat colors. It delivers easy application, easy sanding, good color hold out and finish.

These products are for the professional painting of automotive vehicles only after referenceto the manufacturer's Material Safety Data Sheets (MSDS)

EFFECTIVE SOLUTIONS
FOR A PERFECT FINISH

KAPCI
COATINGS

Ancillaries

Protection & Remover

Kapci 003

Paint Remover

Kapci 003 is solvent-based paint remover designed for removal of paints (acrylic, polyurethane, and epoxy) from metal surfaces. Kapci 003 paint remover is thixotropic, mildly alkaline chemical liquid that penetrates the paint and ensures its easy removal.

Kapci 100

Underbody

Kapci 100 is a product based on Modified Alkyd designed to protect car underbody from stone chipping and corrosion. It can also be applied over the body floor and other metal parts. Kapci 100 gives anticorrosion properties, excellent adhesion and chemical resistance.
It is mixed with 20% Kapci 525 NC thinner and mixes well.

These products are for the professional painting of automotive vehicles only after referenceto the manufacturer's Material Safety Data Sheets (MSDS)

Kapci 100S

Underbody
Ready to spray

Kapci 100S is a product based on Modified Alkyd designed to protect car underbody from stone chipping and corrosion. It can also be applied over the body floor and other metal parts. Kapci 100S gives anticorrosion properties, excellent adhesion and chemical resistance. The product is ready for use.

Kapci 222

Underbody

Kapci 222 is a 1K underbody product based on modified alkyd resin designed to protect car underbody from corrosion as well body floor and other metal parts. Kapci 222 gives anticorrosion properties, excellent adhesion and chemical resistance.

These products are for the professional painting of automotive vehicles only after referenceto the manufacturer's Material Safety Data Sheets (MSDS)

Kapci 605

Degreaser

Kapci Degreasers are designed especially for use in the preparation process to remove dirt, grease, and other contaminants from the surface. Kapci 605 Degreaser is a preparatory product suitable for degreasing and cleaning of sanded surfaces and old finishes.

Kapci 606

Degreaser

Kapci Degreasers are designed especially for use in the preparation process to remove dirt, grease, and other contaminants from the surface. Kapci 606 Degreaser is a product used as a step of the preparatory process for removing of grease, wax, dirt and other contaminants from bare metal.

These products are for the professional painting of automotive vehicles only after reference to the manufacturer's Material Safety Data Sheets (MSDS)

Kapci 615

Adplast
Plastic Primer

Kapci 615 Adplast is a 1K primer for plastic. It is used as a direct primer over variety of plastics prior to applying any subsequent coat. The product can be used at temperature above 18°C.

Kapci 616

Adflex
Flexible Additive for Plastic

Kapci 616 Adflex is a flexible additive for plastic. It is added to Kapci range of 2K fillers 2K acrylic topcoat and 2K clearcoats to enhance flexibility over flexible and very flexible plastics.

These products are for the professional painting of automotive vehicles only after reference to the manufacturer's Material Safety Data Sheets (MSDS)

Kapci 619

1K Sealer

Kapci 619 is 1K acrylic sealer ready-for-use. This non-sanding sealer is used for wet-on-wet spot and panel repair and can be applied under a wide range of topcoats. It delivers good topcoat holdout and adhesion.
Kapci 619 is produced as transparent and colored (white, black, and grey) sealer which can be tinted up to 10% by mass with Kapci TPA paints.

Kapci 620

2K Transparent Sealer

Kapci 620 is an extraordinary 2K transparent acrylic sealer with excellent adhesion properties over non-sanded areas hence eliminating the requirements for sanding. This versatile product can be used as:
1. Adhesion promoter over non-sanded finishes
2. Non-sanding (wet-on-wet) sealer
3. Flattable isolator over sanded areas.

Kapci 620 2K Transparent sealer can be tinted with Kapcicryl 660 2K paints up to 10% by volume.

Kapci 6510

Accelerator

Kapci 6510 is a conventional accelerator intended to speed cure time, dry to handle time, tape time, etc. It is a very reactive product and great care must be taken in the quantity added. Kapci 6510 Accelerator must not be mixed with extra fast and fast drying hardeners and is recommended for the temperature range 10°C-20°C.

These products are for the professional painting of automotive vehicles only after referenceto the manufacturer's Material Safety Data Sheets (MSDS)

KAPCI
COATINGS

Kapci Mixing Scheme & Ready Mixed Colors

Kapci 660

2K Acrylic Topcoat

Kapcicryl 660 is a 2K acrylic mixing system for repainting of passenger cars and commercial vehicles. Kapcicryl 660 delivers 2K acrylic-urethane direct gloss topcoats having high gloss, excellent durability and excellent coverage. In conjunction with a range of Kapci MS hardeners, Kapcicryl 660 2K topcoats can be used for any size of repair jobs.

Kapci 641

Ready Mixed 2K Acrylic Topcoats

Kapcicryl 641 is a 2K acrylic ready mixed topcoat for repainting of passenger cars and commercial vehicles. Kapcicryl 641 delivers 2K acrylic-urethane direct gloss topcoats having high gloss, excellent durability and excellent coverage. In conjunction with a range of Kapci MS hardeners, Kapcicryl 641 2K topcoats can be used for any size of repair jobs.

These products are for the professional painting of automotive vehicles only after referenceto the manufacturer's Material Safety Data Sheets (MSDS)

Kapci 660 C333

Matting Agent

Kapci C333 is a matting agent which is added into Kapci 2K Acrylic Topcoats in order to provide matt smooth final finish.

Kapci 660 C334

Texture Additives

Kapci C334 is a texture additive which is added into Kapci 2K Acrylic Topcoats in order to match texture of variety of plastics. Kapci C334 Texture Additives are developed to produce three different ranges of textures including fine, coarse and ultra coarse.

These products are for the professional painting of automotive vehicles only after referenceto the manufacturer's Material Safety Data Sheets (MSDS)

Kapci 670

Basecoat Colors

Kapcibase 670 is a solvent-based basecoat mixing system for repainting of passenger cars and commercial vehicles. It offers solid color basecoats, metallic basecoats, pearlescent and special effect basecoats. Kapcibase 670 basecoat color is easy to use, fast drying and has very good coverage and durability. When used in conjunction with a range of Kapci clearcoats, Kapcibase 670 delivers long-lasting high gloss finish.

Kapci 670

Special Colors Basecoat

Kapci Special Magic Color contains multi-layer pigment flakes which give paint film the ability to change color when is viewed from different angles. Each Special Magic Color gives extraordinary chroma and brilliant appearance depending on both the angle at which it is viewed and the angle of the incident light. Kapci Special Magic Colors are fully compatible with Kapcibase 670 transparent basecoat toners and can be mixed with them to deliver customized basecoat colors as per customer needs.

Kapci 640

Ready Mixed Basecoats

Kapcibase 640 is solvent-based ready mixed basecoat for repainting of passenger cars and commercial vehicles. Kapcibase 640 offers ready mixed solid color, metallic, pearlescent, and special effect basecoats. When used in conjunction with a Kapci range of clearcoats, Kapcibase 640 ready mixed colors deliver a durable and high gloss finish.

Hardeners

Products

Kapci Hardeners

Kapci Hardeners are polyisocyanate based hardeners used for Kapci 2K products. They are carefully selected and designed for use with Kapci acrylic topcoats, clearcoats, and fillers.
The hardeners' selection and their broad range assist in optimizing of all painting conditions and size of repair so that highly reliable application can be achieved.

Products.	Description.
Kapci 651	**Normal MS hardener** Suitable for partial and complete respray at normal temperature.
Kapci 652	**Fast MS hardener** Suitable for partial and medium size respray at low temperature.
Kapci 653	**Extra fast MS hardener** Suitable for spot and partial respray at low temperature.
Kapci 656	**Slow MS hardener** Suitable for partial and complete respray at high temperature.
Kapci 6033	**Fast hardeners** Suitable for partial and medium size respray at low temperature.
Kapci 6035	**Normal hardeners** Suitable for partial and complete respray at normal temperature.
Kapci 6037	**Slow hardener** Suitable for partial and complete respray at high temperature.
Kapci 6054	**Fast HS hardener** Suitable for partial and medium size respray at low temperature.
Kapci 6055	**Normal HS hardeners** Suitable for partial and complete respray at normal temperature.
Kapci 6056	**Slow HS hardener** Suitable for partial and complete respray at high temperature.

KAPCI
COATINGS

Thinners

Products

Kapci
Thinners

Kapci Thinners are especially designed to suite the application viscosity and the drying time of Kapci Car Refinish products when used with Kapci Hardener.
Kapci thinners including Fast 600F, Normal 600, Slow 601 or Extra Slow 602 thinner, assist in optimizing all painting conditions, size of repair, delivering highly reliable application processes, and finishing.

Products.	Description.
Kapci 600 F	**Fast Thinner** Universal thinner for 1K Etch Primers, TPA products, 2K Acrylic Fillers, 2K Sealers, 2K Acrylic Topcoats, Basecoats and Clearcoats. It adjusts the application viscosity at low temperatures from 15°C to 20°C.
Kapci 600	**Normal Thinner** Universal thinner for 1K Etch Primers, TPA products, 2K Acrylic Fillers, 2K Sealers, 2K Acrylic Paints, Basecoats and Clearcoats. It adjusts the application viscosity at normal temperatures from 20°C-25°C.
Kapci 601	**Slow Thinner** Universal thinner for TPA products, 2K Acrylic Fillers, 2K Sealers, 2K Acrylic Paints, Basecoats and Clearcoats. It adjusts the application viscosity at temperature above 30°C.
Kapci 602	**Extra Slow Thinner** Universal thinner for 2K Acrylic Fillers, 2K Sealers, 2K Acrylic Paints and Clearcoats. It is not recommended for Basecoats. It adjusts the application viscosity at temperature above 35°C.
Kapci 608	**Rapid Thinner** Thinner used in 2K Filler Kapci 626
Kapci 610	**Metallic Thinner** Thinner used only in Basecoats.
Kapci 611	**Spot Repair Thinner** Kapci 611 is a product especially designed for blending-in of Kapcibase 670 solvent-based basecoat colors. It assists to achieve a smooth homogeneous overspray area in the fade-out zone. It smoothes the transition area from the fade-out zone into old paint work. Kapci 611 is a ready for use product. Mixed 30%-50% by volume with Kapcibase basecoat colors.

These products are for the professional painting of automotive vehicles only after referenceto the manufacturer's Material Safety Data Sheets (MSDS)

KAPCI
COATINGS

Clearcoats

Products

Kapci 888

2K MS Clearcoat

Kapci 888 is a 2K medium solids acrylic clearcoat especially formulated for applying over solvent-based basecoats. It delivers high gloss, high durable and long-lasting finish when used in conjunction with Kapci MS hardeners 651 Normal, 652 Fast, 653 Extra Fast or 656 Slow.

Kapci 3001

2K MS Clearcoat

Kapci 3001 is a 2K medium solids acrylic clearcoat especially formulated for applying over solvent-based basecoats. It delivers high gloss, high durable and long-lasting finish when used in conjunction with Kapci MS hardeners 651 Normal, 652 Fast, 653 Extra Fast or 656 Slow.

Kapci 3100

2K MS Clearcoat

Kapci 3100 is a 2K medium solids acrylic clearcoat especially formulated for applying over solvent-based basecoats. It gives high gloss and "water like" final appearance. It offers high durability and weathering resistance. When used in conjunction with Kapci MS hardeners 651 Normal, 652 Fast, 653 Extra Fast or 656 Slow, Kapci 3100 delivers high gloss and excellent finish.

Kapci 3150 Matt

2K Matt Clearcoat

Kapci 3150 Matt is a 2K medium solids acrylic clearcoat designed for repairs of surfaces requiring matt finish. It delivers flexible and matt finish, and is used in conjunction with standard Kapci hardeners - 653 Extra Fast, 652 Fast, 651 Normal, or 656 Slow.

These products are for the professional painting of automotive vehicles only after referenceto the manufacturer's Material Safety Data Sheets (MSDS)

Kapci 3200

2K MS Clear Coat

Kapci 3200 is a 2K acrylic clearcoat especially formulated for applying over Kapcibase and Laticobase basecoat colors. When used in conjunction with standard Kapci hardeners - 651 Normal, 652 Fast, 653 Extra Fast or 656 Slow, Kapci 3200 delivers high gloss, durable and long-lasting finish.

Kapci 3300

2K Fast Drying Clearcoat

Kapci 3300 is a fast drying 2K medium solids acrylic clearcoat for spot and panel repairs over solvent-based basecoats. It is designed to give the maximum in speed and productivity, while providing high gloss retention and excellent appearance when used in conjunction with Kapci MS hardeners 651 Normal, 652 Fast and 653 Extra Fast.

Kapci C9999

2K MS Clear Coat

Kapci C9999 is a 2K medium solid acrylic clearcoat especially formulated for applying over Kapci basecoats. It delivers good gloss when is used in conjunction with Kapci MS hardeners and Kapci 2K Thinners.
