

Latico 5100S Underbody

Product description

Latico 5100S is a product based on bituminous material designed to protect car underbody from stone chipping and corrosion. It can also be applied over body floor and other metal parts. Latico 5100S gives anticorrosion properties, excellent adhesion, and chemical resistance. The product is ready for use.

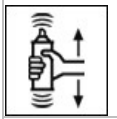

Substrates

Latico 5100S undercoat should be applied over rust free and degreased bare metal. For longer resistance to corrosion, it is recommended to apply an anticorrosive primer prior to overcoating with Latico 5100S.

Application

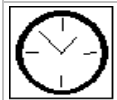

Thoroughly degrease the surface. For steel use Kapci 606 degreaser for metal.

Latico 5100S is ready for use product. Shake the product well before use.

Use special underbody (UB) gun for underbody products
Nozzle: 6-8mm; Pressure:4-5 bar
Apply 1-2 coats

Air dry at 20°C:
Dry to handle: 2-3h
Hard dry: 24h

Health and Safety

1. For full Health and Safety information refer to the Material Safety Data Sheet (MSDS).
2. Observe the precautionary notices displayed on the container.
3. Goggles and suitable protective equipment must be worn while using these products.
4. Good ventilation must be provided in the working environment.
